The Board of Directors lays down the policies for the Company's business strategy, organisation, accounting and financial affairs and appoints a Management Board to be in charge of the day-to-day operations of the Group.

The Board of Directors is made up of three members elected by the shareholders in general meeting. An overview of the Board of Directors and the Management Board can be found in the annual report in the section "Board of Directors and Management Board".

In accordance with the Articles of Association, the members of the Board of Directors elected by the shareholders are elected for terms of one year at the annual general meeting. The term for the current Board of Directors expires on 8 March 2017 and the members are eligible for re-election. According to the Articles of Association, the retirement age for Board members is 70 years.

When composing the Board of Directors, the aim is for the majority of the Board members elected by the shareholders to be independent of special interests relative to the Group, major shareholders, chief suppliers and key accounts.

Two of the three four Board members elected by the shareholders are independent of special interests. The Deputy Chairman of Cemat's Board of Directors is not independent as Eivind Dam Jensen controls 14% of Cemat's share capital.

When composing the Board of Directors, it has been considered important that the members have general management experience, have industry insight and possess professional skills pertaining to listed companies' financial and economic matters.

Board meetings are held at least five times a year. The Board of Directors follows an annual plan which is determined at the first meeting of the Board of Directors after the annual general meeting. The Board of Directors otherwise convenes as and when deemed necessary. Fifteen board meetings were held in 2016.

The Board of Directors conducts its business in accordance with the rules of procedure, which comply with the provisions of s. 130 of the Danish Companies Act applicable to listed companies. Among other things, the rules of procedure contain guidelines for the division of responsibilities between the Board of Directors and the Management Board, and provide for the application of minute books, a register of shareholders and other protocols. The rules of procedure determine the Board of Directors' duties to actively discuss the Company's organisation and internal control procedures as well as its duties to actively follow up on plans, budgets and cash position, as well as other important issues.

A revised remuneration policy will be proposed at the first coming annual general meeting. It is the aim of the Board of Directors that the remuneration policy reflects the interests of the shareholders and the Company and helps promote long-term goals. Furthermore, the Company

seeks to offer a compensation package conforming to market standards for the Board of Directors and the Management Board to retain the current management and attract new qualified candidates.

Remuneration to the Management Board

Performance-related incentive schemes contribute to promoting behaviour that supports the achievement of the Company's objectives. INTERNAL CONTROLS AND RISK MANAGEMENT SYSTEMS IN RELATION TO THE FINANCIAL REPORTING PROCESS

The Board of Directors of Cemat has the overall responsibility for the establishment of an efficient risk management system, comprising systematic internal controls and follow-up. The Audit Committee monitors risk management and internal controls in relation to the financial reporting process.

General risk assessment and management

As part of the Board of Directors' annual strategy review, Management conducts an overall risk assessment for the Group in order to determine which processes and factors, internal as well as external, could potentially affect the Group's business platform and development.

The risk assessment mainly comprises identification of business risks and control measures are identified for the most significant risks, e.g. in the form of action plans, to reduce and handle risks.

Risk assessment and internal control systems at Cemat

In connection with the current follow-up on the Group's strategy and development, Management assesses the risks identified and addresses any new risks during the strategy period.

The objective of risk management is not to eliminate all risks, but to actively determine which risks are acceptable to and manageable by the Group and which risks to avoid entirely. Risk management is an integral part of the day-to-day business management and is subject to continuous review by Management.

In respect of the special risks identified by Cemat, reference is made to "Risks and risk management" and note 31 to the annual report about "Financial risks and financial instruments".

The Group has chosen to arrange for insurance cover within a number of general areas.

The Group operates with a low risk profile to ensure that currency, interest rate and credit risks arise only in connection with commercial relations. It is the Group's policy not to actively speculate in financial risks. The Group's currency, interest rate, credit and liquidity risks are described in a note to the consolidated financial statements.

Risk assessment relating to the financial reporting process

The overall risk assessment also comprises risks relating to financial reporting and hence matters which could affect the completeness, accuracy and valuation-related matters relative to the Group's financial reporting. The risk assessment also comprises the risk of loss or misuse of assets.

Control system

Cemat's CEO is responsible for maintaining efficient internal controls.

All subsidiaries and business units of the Group have appropriate internal controls, covering the most significant risks. Internal policies and procedures, manuals and legislation and other external regulation form the basis of the internal control environment, and the Group's employees are held responsible through organisational structures in the Group with clearly defined responsibilities and authority.

Control measures may alleviate the identified risks and ensure compliance with the basic criteria for financial reporting. The Group's control measures comprise general as well as detailed controls to prevent, identify and correct errors and irregularities. The Group has the following overall control measures:

- Manual controls — examples of important manual controls are signed bookkeeping lists, reconciliation, rights of access, master data and segregated functions to the extent permitted by the size of the organisation.
- Programmed controls – examples of important programmed controls are validation of entries, including that data is only registered and applied centrally, automatic reconciliation of invoices with purchase orders and other reconciliation between the ERP modules.
- General IT control – examples of important IT controls are user administration, production and test environment and backup procedures.

Documentation of procedures is part of the internal control system and consists of flowcharts of procedures and descriptions of control measures. The process comprises formal as well as informal procedures used by Management, including assessments of results relative to budgets, strategy plans and selected key performance indicators (KPIs). The Group has established procedures to provide Management with a basis for assessing the Group's financial position. These procedures/reports comprise i.a.:

- a review of strategic and business objectives at least once a year
- a formalised annual budget with forecast and estimation procedures

Furthermore, management reporting is prepared on a current basis, comprising:

- financial results and financial position, including analysis of cash flows and financial structure in the parent company and subsidiaries
- comparison of budgeted financial results, results from previous years and actual results

Also, the external auditors report to Management and the Audit Committee who assess the results of current examinations performed to determine to what extent Management and the Audit Committee may rely on the reports/processes which are primarily prepared and performed by the finance department.
